## ECU Cable FLX2.67

FLX2.67 connector to EDC17C60 Cable in BENCH MODE CONNECTION

SKU Code: FLX2.67

This Cable allows the interface of some types of ECU with FlexBox. As shown in the technical design section (Fig.1), it is necessary to connect to the FlexBox ports A and B. The goal of the FLX2.67 Cable is to obtain:

- A secure connection mode
- A faster communication speed between ECU and FLEX
- A faster connection between ECU and FlexBox
- A minimal error risk during connection

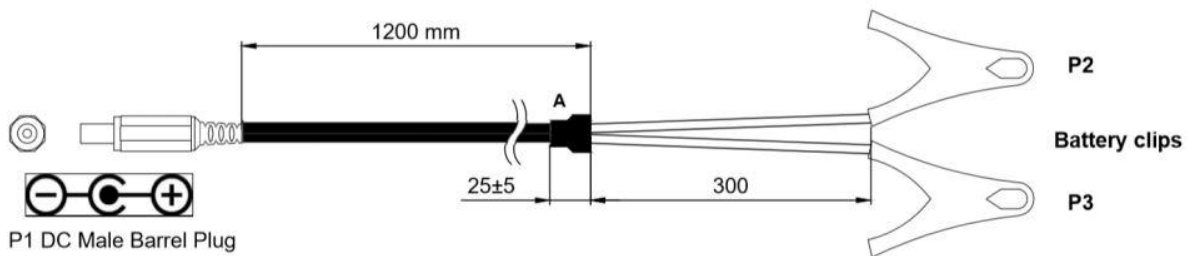

### **ECU Compatibility:**

- EDC17C60

### **Brand and Model:**

- Citroen - Peugeot - Toyota

Additional Accessories;  
FLX2.45

Correct disposal:

Waste electrical and electronic equipment is waste of a particular type consisting of many electrical or electronic equipment that the owner intends to discard as it is defective, unused or obsolete and therefore destined to be abandoned.
