

ECU CABLE FLX2.69

# USER MANUAL

**P1 CONNECTOR TO M3C**  
CABLE IN **BENCH MODE CONNECTION**  
SKU code : FLX2.69

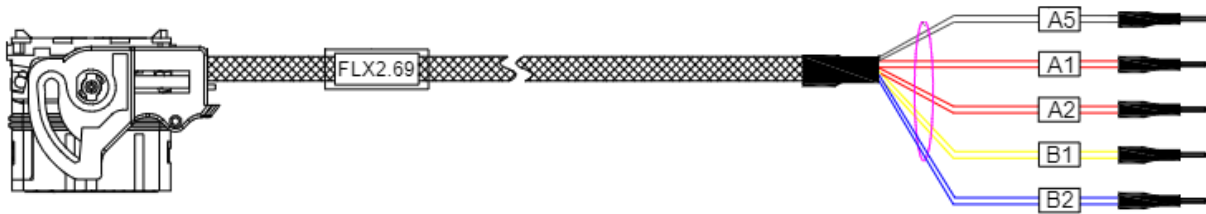

Fig.1

# ECU Cable FLX2.6g

FLX2.6g P1 connector to M3C Cable in BENCH MODE CONNECTION

SKU Code: FLX2.6g

This Cable allows to interface some types of ECU with FlexBox. As shown in the technical design section (Fig.1), it is necessary to connect to the FlexBox ports A and B. The goal of the FLX2.6g Cable is to obtain:

- A secure connection mode
- A faster communication speed between ECU and FLEX
- A faster connection between ECU and FlexBox
- A minimal error risk during connection

Compatibility ECU's:

M3C

Some of the supported vehicles:

Arctic Cat Alterra AVTS 433cc

Can-Am Outlander ATV 650cc 59PS

Can-Am Renegade 850cc 78PS

Ducati Hypermotard 1100cc 85PS

Ducati Monster 700cc 76PS

Husqvarna TE 300cc 51HP

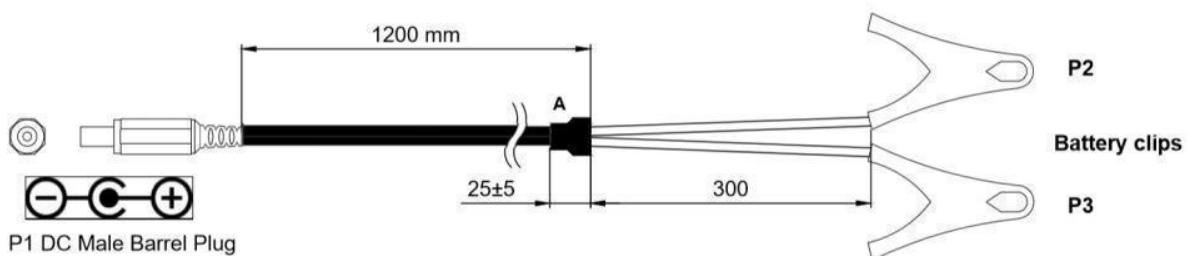

KTM EXC 250cc 20HP

Kymco Maxxer 450cc 30HP

TBG Blade 1000cc 89HP

Additional Accessories;

FLX2.45

Correct disposal:

Waste electrical and electronic equipment is waste of a particular type consisting of many electrical or electronic equipment that the owner intends to discard as it is defective, unused or obsolete and therefore destined to be abandoned.
