

ECU CABLE FLX2.60

# USER MANUAL

**P1 CONNECTOR TO Gen3**  
CABLE IN **BENCH MODE CONNECTION**  
SKU code : FLX2.60

Fig.1

# ECU Cable FLX2.60

FLX2.60 P1 connector to GEN3 Cable in BENCH MODE CONNECTION

SKU Code: FLX2.60

This Cable allows to interface some types of ECU with FlexBox. As shown in the technical design section (Fig.1), it is necessary to connect to the FlexBox ports A and B. The goal of the FLX2.60 Cable is to obtain:

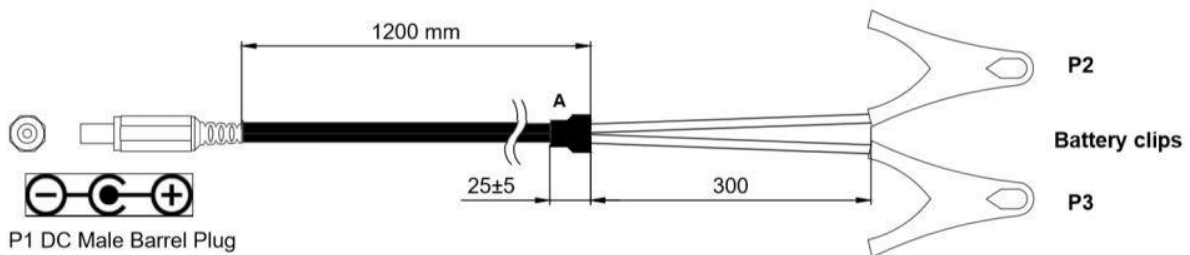

- A secure connection mode
- A faster communication speed between ECU and FLEX
- A faster connection between ECU and FlexBox
- A minimal error risk during connection

Compatibility ECU's:

TOYOTA Gen3

Additional Accessories;

FLX2.45

Correct disposal:

Waste electrical and electronic equipment is waste of a particular type consisting of many electrical or electronic equipment that the owner intends to discard as it is defective, unused or obsolete and therefore destined to be abandoned.
