ECU Cable FLX2.18

FLX2.18 P1 Bosch connector to MB_Bosch MDG1 - EDC17CP44 Cable in BENCH MODE CONNECTION

SKU Code: FLX2.18

This Cable allows to interface some types of ECU with FlexBox. As shown in the technical design section (Fig.1), it is necessary to connect to the FlexBox ports A and B. The goal of the FLX2.18 Cable is to obtain:

- A secure connection mode
- A faster communication speed between ECU and FLEX
- A faster connection between ECU and FlexBox
- A minimal error risk during connection
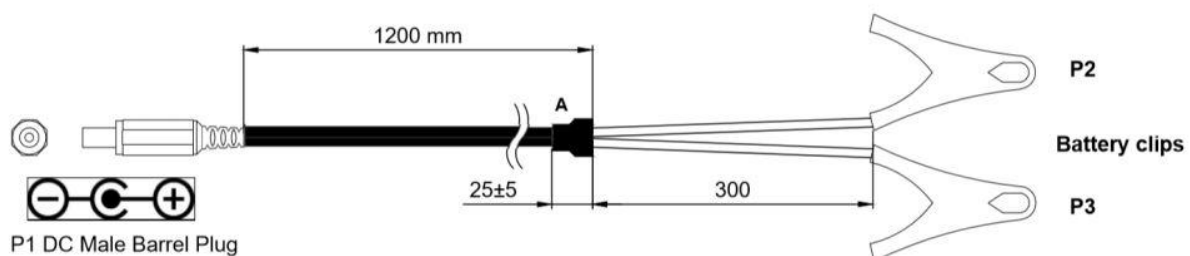

ECU Compatibility:

- MG1CS001
- MG1CP163
- MD1CP014
- MG1CS001
- EDC17CP44

Brand and Model:

- Alfa Romeo - Audi - Seat - Skoda - Volkswagen

Additional Accessories;

FLX2.45

Correct disposal:

Waste electrical and electronic equipment is waste of a particular type consisting of many electrical or electronic equipment that the owner intends to discard as it is defective, unused or obsolete and therefore destined to be abandoned.
