ECU Cable FLX2.49

FLX2.49 P1 Bosch connector to EDC17C74 Cable in BENCH MODE CONNECTION.

SKU Code: FLX2.49

This Cable allows the interface of some types of ECU with FlexBox. As shown in the technical design section (Fig.1), it is necessary to connect to the FlexBox ports A and B. The goal of the FLX2.49 Cable is to obtain:

- A secure connection mode
- A faster communication speed between ECU and FLEX
- A faster connection between ECU and FlexBox
- A minimal error risk during connection

ECU Compatibility:

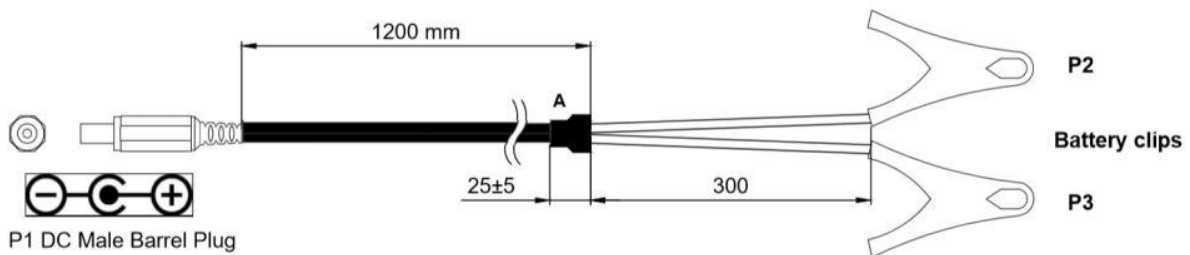

- EDC17C74

Brand and Model:

- Audi
- Skoda
- Volkswagen

Additional Accessories;

FLX2.45

Correct disposal:

Waste electrical and electronic equipment is waste of a particular type consisting of many electrical or electronic equipment that the owner intends to discard as it is defective, unused or obsolete and therefore destined to be abandoned.
